

## Product Designer

Company: VFA Solutions  
Website: [www.vfa-solutions.com](http://www.vfa-solutions.com)

Location: Schiedam  
Start date: September 2015 onwards

### The Company

VFA Solutions is an expert in measuring, recognising and creating healthy indoor air quality. Our R&D department creates new technologies and patents as well as combine existing technologies to optimize the performance and applications of our products. VFA Solutions distinguishes itself from the competition through in-house knowledge of indoor air quality issues and solutions. Our portfolio ranges from air purifiers for markets such as homes, utility, healthcare, agriculture, and industry, but we also provide custom solutions for any indoor air quality related problem.

### We are looking for...

We are looking for a motivated Product Designer to join our team. The ideal candidate has excellent CAD skills and affinity with our field. Eagerness to learn new CAD programs and technical documentation methods is also essential. You will work in our development team to assist in revising our existing products as well as making new products production ready. You can start as soon as possible from September 2015 onwards. Your time commitment is flexible, part-time or full time.

### Required

- Excellent CAD skills and willingness to learn new CAD programs and technical documentation methods.
- Good communication skills in Dutch or English.
- Can work well within a team.
- Motivated, proactive attitude.
- Taking responsibility for own tasks.
- Flexible in taking on other tasks such as assisting with experiments and prototyping.
- Skills in product animation are not required but appreciated.

### Possible backgrounds

- Industrial Design Engineering
- Integrated Product Design
- Mechanical Engineering
